

Gro2Health Group / Crestview, FL

Hello Robin,

Here is an exciting update on the hydroponic garden that has been, all REVV'ed up!!!! I planted the plants in 70% Coco Coir and 30% DAKOTA Peat as you recommended and all I can say is WOW! The plants have been in the greenhouse for over 3 1/2 weeks now and as you can see the results have been amazing. Please use these pictures to tell others about how amazing DAKOTA is for plant growth. I gave the plants the full strength hydroponic nutrients. So far things are looking good.
